CAREER OBJECTIVE

Aspiring Data Science and AI Engineer passionate about Machine Learning, Generative AI, and Distributed Systems. Dedicated to building intelligent, scalable software and automation tools that solve real-world problems.

EXPERIENCE

Freelance Web Developer May 2026 – Present
Aranyam Restaurant (Client Engagement) Telangana, India

- Designed and deployed the official live website for Aranyam, a 3-location restaurant chain, using React, Vite, and Tailwind CSS; the build was successfully adopted as their primary digital site.
- Delivered a high-performance, mobile-responsive UI that significantly increased brand visibility, resulting in a direct offer from the client to architect their official Android catering and food-ordering application.

Android Developer Intern Jul 2024 – Sep 2024
Google for Developers & AICTE EduSkills Remote

- Earned Grade 'O' (Outstanding) for top-tier execution of an intensive 10-week development program.
- Built scalable mobile applications using Kotlin/Java following modern MVVM and Clean Architecture.
- Utilized Jetpack libraries (ViewModel, Room) and RESTful APIs to ensure high-performance, offline-first capabilities.

PROJECTS

RescueNet Pro – AI-Driven Disaster Communication Network

- Developed a decentralized communication system using Clean Architecture, Flutter, Kotlin, and Python for offline connectivity.
- Built a Mobile Ad-Hoc Network via Wi-Fi Direct (P2P) with a Q-Learning routing algorithm.
- Explored Quantum Computing concepts for secure cryptography; integrated TensorFlow Lite for on-device AI and AWS DynamoDB.

Grace – AI Voice Assistant

- Built a voice assistant using Python, Ollama, LangChain, and CrewAI for executing system commands and automation.
- Implemented wake word detection with Vosk and integrated Local LLMs for conversational AI to provide desktop control.

Spatial Audio Processing Engine

- Developed a high-performance audio processing web app using Python, PyDub, and FFmpeg to transform standard tracks into immersive spatial (8D) audio with a clean HTML/CSS/JS frontend interface.

TECHNOLOGIES

Languages: Java, Python, SQL, JavaScript, R

Web Development: HTML, CSS, React.js, Tailwind CSS

AI / Data Science: Machine Learning, Generative AI, LangChain, CrewAI

Mobile / Cloud: Flutter, Kotlin, TensorFlow Lite, AWS DynamoDB

Tools: Git, GitHub, Docker, VS Code, Vercel, Render

CERTIFICATIONS

- Oracle Data Science Professional
- AWS Cloud Foundations And Architectures
- Oracle DevOps Professional
- Google Cloud Gen-AI Studio
- CISCO Linux Essentials

EDUCATION

B.Tech Data Science — Vignan Bharathi Institute of Technology 2023–2027

Intermediate — Narayana IIT Koheda 2021–2023

SSC — Vani Secondary School 2021

HOBBIES & INTERESTS

- Interested in literature and psychology; read classics like *Crime and Punishment* and *The Brothers Karamazov* by Dostoevsky.
- Actively track global history, geopolitics, and international relations to analyze macroeconomic strategies.
